Articulated arms with quick central fixation for secure arm positioning during surgical interventions

Arm support lateral

Arm support vertical

FISSO
Swiss Made

Simply the best fixation.

Easy and secure arm positioning.

Reliability plus rapid setup and use are essential prerequisites for surgical equipment.

Fisso Arm supports have been developed in close cooperation with Swiss hospitals. They are easy to position, and can be fixed securely and rapidly with a single knob. The purely mechanical central tightening device enables simple and secure holding of the patient's arm during surgery.

OR nursing staff confirms: "The Fisso Arm support with quick central fixation is very efficient and absolutely reliable. It is indispensable in our daily work in the operating theater."

Fisso systems are made of high-quality steel and light alloy. The products can be cleaned and disinfected on the surface, but not sterilized. Their solid quality guarantees a long-lasting service life.

Standard sets for arm positioning in lateral and dorsal position.

Art. No.	Designation	Arm support lateral	Arm support vertical
		4646.01	4670.01
Head component			
5.415	Arm board 450 mm	●	●
Articulated arms (length, upper/lower thread)			
2.222	Articulated arm 4600-46 (460 mm, M12x1 / M12x1)	●	
2.225	Articulated arm 4600-70 (700 mm, M12x1 / M12x1)		●
Columns (Ø x length, upper/lower thread)			
5.465-1	Column (Ø16 x 215 mm, M12x1 / M8)		●
93.680	Stop lid (M8, Ø 24 mm)		●
Base component			
5.291	Rail clamping base (Maquet-System)	●	
Optional
